

Unex at Innotrans 2016

HL3-R22 acc./ EN 45545-2

Unex, European manufacturer of insulating thermoplastic **cable management systems** is a technological benchmark in its speciality and offers high quality products for rolling stock and railway infrastructure.

www.unex.net

After several years visiting and attending meetings at Innotrans, last September Unex participated for the first time with its own stand, where we presented our outstanding solutions for the railway sector:

Rolling stock. [Read more](#)

Slotted trunking **88** in **U43X**

An in-house formulated halogen free thermoplastic compound, with the **best results HL3-R22** according to **EN 45545-2:2013**

Infrastructure. [Read more](#)

Insulating cable tray **66** in **U41X** / **U43X**

Assuring electrical, mechanical and fire safety throughout the installation while reducing mounting and maintenance costs, due to its durability and lack of earthing.

More than 100 visitors from 32 countries (mainly EU) visited our stand, showing great interest in the technical characteristics of our products, our landmark projects and a possible collaboration, providing a very positive exchange of knowledge and a rich professional experience.
